

EXPERT STAFF. INDUSTRIAL PRODUCT SUPPORT.

We are pump and process equipment experts. At IPEG we develop long lasting relationships with our customers and provide ongoing technical expertise, product support, custom fabrication and repair services.

WE DELIVER COMPLETE REPAIR SERVICES

You can depend on IPEG for complete, professional equipment repair and maintenance services. We have the knowledge and experience to maximize the performance of your pumps, fans, blowers and gearboxes, ultimately saving you time and money. Our factory-trained service technicians repair and maintain your products, parts and equipment throughout their lifetime. As a factory-authorized warranty and service center for our product lines, we can provide you with repair estimates, field repairs and on-site maintenance work.

Our service technicians and field sales engineers are trained to diagnose equipment problems and help resolve issues at the job site. In addition to equipment repair, we also perform contractual maintenance, laser alignment and installation of equipment.

With three convenient locations and more than 40,000 square feet of extensive machine shop capabilities, we can provide you with the technical support and expert parts and repair services you need, when and where you need them.

WE DELIVER SPECIALIZED KNOWLEDGE

Our engineers and support staff are among the most experienced in the industry and provide helpful and accurate technical support. We don't put a band-aid on your problems—we fix them. IPEG is your most complete resource for process equipment repairs because we provide more than just accurate quotes and reliable service: we are available to you 24/7. Increase uptime, reduce your maintenance cost and lead times, and gain total process control and maximum equipment performance.

WE DELIVER A THOROUGH REPAIR PROCESS

Upon your approval, we begin the repair process. Our experienced technicians carefully inspect each phase of the process to maximize quality control. At IPEG we have the in-house capabilities to perform repairs on large and small projects. We control the machining, assembly, balancing, painting and testing phases of your product. Before your equipment leaves IPEG, it undergoes thorough testing to meet your needs.

WE DELIVER EXPERT FIELD SERVICE SUPPORT

For complete peace of mind, our maintenance teams provide field service support for all equipment supplied for repair, including testing, calibration and system analysis. Our repair team is prepared with the latest equipment and training to correctly specify, install, troubleshoot and maintain your liquid or air process system.

WE DELIVER QUALITY PARTS

Gain access to IPEG's fully stocked warehouse and wide selection of parts and equipment available to satisfy temperature, chemical compatibility, abrasion and longevity concerns. When you have genuine spare parts, your products continue to work at optimum efficiency, maintain performance, have a longer life and avoid expensive unplanned downtime. We can restore your process equipment to factory tolerances by re-machining or replacing parts. IPEG is also a specialist in custom parts manufacturing and is capable of producing high-quality fabricated parts to meet your requirements.

WE DELIVER CUSTOM FABRICATION

At IPEG we take service to a whole new level. We can custom design an equipment skid to fill your special requirements. We start with your unique specifications and then create CAD drawings in-house. From these drawings, we purchase the parts and assemble the skid—all under one roof. Simplify your purchasing process with one order for a full system that includes all the necessary components, including pumps, valves, filters and much more. We take full system and mechanical responsibility for the components on the skid, so you can rest assured that each component works correctly and efficiently. This results in a professional, high-quality custom fabrication that meets your exact needs.

IPEG HAS THREE MIDWEST LOCATIONS TO CONVENIENTLY SERVE YOU
